Kanoria Chemicals and Industries Ltd. (KCI) operates three alco-chemical manufacturing facilities in India, producing a range of products, located at Ankleshwar (Gujarat), Visakhapatnam (Andhra Pradesh) and Naidupeta (Andhra Pradesh). We manufacture Phenol Formaldehyde resins at Ankleshwar and Visakhapatnam.

KCI's manufacturing facilities can produce a wide range of Novolac, Resole and similar resins. They feature extensive automation for precise mass transfer and temperature control, leading to products of high quality and consistency under safe conditions. The resin powdering facilities are virtually hands-free and dust-free. With proximity to all major chemicals, our plants can cater to the regular, special and urgent needs of a wide range of Phenol Formaldehyde resin consumers.
